

MV SOLUTION UP TO 8.4 MVA.

A MEDIUM VOLTAGE STATION FOR VIRTUAL CENTRALIZED BES SYSTEMS WITH 1,500 V STRING INVERTERS

MV station designed to connect and hold Ingeteam's three-phase string inverters working as an interface with the grid.

String inverter optimization

The StringStation has been conceived to enable and optimize the use of Ingeteam's INGECON® SUN STORAGE 350TL inverters, ensuring a perfect connection between the BESS plant and the grid. This turnkey solution is capable of connecting up to 8.4 MW of 1,500 V 3Play inverters to a medium voltage grid.

Available worldwide

The INGECON® SUN Virtual Central Station can be marketed and installed everywhere in the world, as it is supplied totally integrated and it is easily transportable as a Plug & Play solution.

Equipped with everything necessary

It is supplied with the low-voltage string-inverter protections, auxiliary services, LV / MV transformer and medium-voltage switchgear.

Maximum cost-effectiveness

The INGECON® SUN Virtual Central Station is a standard solution designed to maximize the compactness and cost-effectiveness of the overall equipment. All the elements are prepared to withstand adverse weather conditions. Moreover, they are supplied pre-connected and preintegrated into a skid in order to guarantee a Plug & Play installation.
